Investing in Public View and Benchmarking

We're evolving Public View to help NHS Trusts achieve even more with their data – aligning with national priorities, enabling meaningful benchmarking.

Upcoming releases ⌄ H2 2025*

To ensure Public View is up to date and aligned with the latest NHS priorities, this release will focus on:

Updated metrics
1. Refreshing all performance data to reflect current NHS priorities

Performance Assessment Framework
2. Bringing metrics into line with the latest NHS performance assessment criteria

Custom Management Groups
3. Create department level scorecards using your own local data

Smarter insights ⌄ H2 2025 and beyond*

AI-powered benchmarking

Public View's advanced AI features take benchmarking to a whole new level, combining large language model capabilities with statistical analysis to deliver:

4. Contextual insights on how your Trust's performance compares to peers

5. Early identification of areas that deviate significantly from national or peer trends

6. Actionable suggestions for deeper review and analysis

Potential future enhancements ⌄

We're committed to continuing to meet your changing needs, including adding functionality for greater customisation.

With Public View you can have your say. You'll be able to gain advanced access to beta versions of the product, enabling you to test and see what's coming. You can also send requests for features, regularly reviewed by the team.

Requests include:

Increased reporting and flexibility
- Upload local metrics for a fuller view of performance
- Adapt Public View to reflect your organisational structure

Improved user access and collaboration
- Simplified login and user access
- Features to support multi-team engagement and shared learning

Designed with the NHS, for the NHS

We continue to listen and evolve Public View based on real-world feedback from NHS teams, ensuring it evolves in line with your changing needs, and remains the tool you can rely on.
