

# Introduction to Microsoft 365 Copilot Chat

## Explore the potential of AI with Copilot Chat

This 1-hour workshop is designed for organisations eager to inspire their staff and explore the power of AI without the need for Microsoft 365 Copilot licences. Using the freely available Copilot Chat experience, we demonstrate practical AI use cases that can benefit individuals and teams across your business right now.

### Key benefits

Immediate insight into the capabilities of generative AI

Demonstrates value without licence investment

Inspires curiosity and engagement across departments

Builds confidence to proceed with AI adoption thoughtfully

### Why it matters

Many organisations want to begin their AI journey but are hesitant to invest in Microsoft 365 Copilot licences before they fully understand the value. They risk missing early adoption advantages while waiting to make decisions.

#### Who is this for?

Businesses curious about AI, including HR, Ops, Marketing, Sales, IT, and L&D leaders

### Package details

The session provides a clear, licence-free entry point into AI:

- Introduction to the rise and impact of generative AI
- Understanding the advantages and limitations of using AI in business
- Demonstration of Copilot Chat and its most valuable features
- Role-based examples to show practical application without commitment
- Brief look at extended capabilities available with license

The workshop can be delivered virtually or in-person at an adjusted rate if you prefer.

### Copilot support from experts you trust

As your Microsoft partner, we're here to help you unlock even more value from your existing investments. With deep expertise in Microsoft 365, AI and data strategy, we'll help you deploy Copilot in a way that delivers value and makes sense – for your teams, your outcomes, and your bottom line.

**Start your AI journey the smart way.**  
**Inspire your people without commitment.**
