Microsoft 365 Licence Review

BCN

Maximise Your Microsoft 365 Investment: Optimise Costs, Boost Productivity, and Prepare for Future Growth.

What is the Microsoft 365 Licence Review?

The Microsoft 365 Licence Review is a comprehensive assessment designed to help your organisation maximise your Microsoft 365 investment.

This comprehensive licence review is designed to help you save money and enhance your security posture by identifying underutilised or duplicated licenses. Our goal is to help you to ensure that you are getting the most out of your Microsoft 365 subscriptions.

Who is the Microsoft 365 Licence Review for?

This review is suitable for all organisations looking to ensure they are getting the most out of their Microsoft 365 subscriptions.

However you procure these (CSP, Enterprise Agreement or Web Direct), we can take a look at your current licenses to help you understand where you could make savings and improve security.

The Review Process:

1. Discovery Workshop

- We will conduct a comprehensive workshop to understand your current Microsoft 365 usage and business needs.
- The review can be conveniently conducted over a call and will last up to one hour.
- During the workshop, we will identify areas for improvement and potential cost savings.

2. Analysis and Recommendations

- Our experts will analyse your current licensing and usage data.
- You will receive tailored recommendations to optimise your Microsoft 365 investment including opportunities to consolidate licenses and eliminate redundancies.
- We will also work with you to highlight potential areas for enhancing productivity and efficiency.

Business Benefits

Cost Savings: Cut unnecessary costs by identifying underutilised or duplicated licenses. Flexera's State of Tech Spend Report indicates that 33% of software spend is wasted due to unused or underused licenses, with Microsoft 365 being one of the top areas of overspend.

Enhanced Security & Compliance: Leverage Microsoft 365's robust security features to protect your data and maintain compliance with industry standards and regulations.

Optimised Productivity: Align tools and features with actual needs to enhance employee productivity and efficiency.

Scalability & Flexibility: Prepare for future growth by aligning your licensing with your evolving business needs, ensuring you can scale easily without overpaying.

Supplier Consolidation: Review potential benefits of third-party consultation to reduce cost and operational complexity, minimising duplicated features within your IT estate.
