

# Unlock the power of SPC in your IPR

**NEW** Spotlight feature

# Drive board level decisions with SPC

The Insight Provider Board guidance from NHS England demonstrates how data should be used to guide board level conversations and reporting for clearer understanding of performance.

It shows how Statistical Process Control is a more effective decision making tool than traditional methods like RAG ratings, which often fail to capture the full picture. Many trusts now rely on SPC as their primary method to analyse data around quality, performance, workforce and finance.

### How EasySPC helps

EasySPC rapidly reduces time taken to create SPC-powered board reports. It enables NHS Trusts to produce board reports in line with best practice in a scalable and efficient way, saving hundreds of staff hours spent manually, creating and updating monthly reports.

Easy SPC	Domain	Indicator			Target		Special Cause			
	Show all	Show all			Show all	~	Show all		~

# Hundreds of charts. One report.

Create a single report to provide a high level view of performance that, through automation, creates hundreds of individual SPC charts.

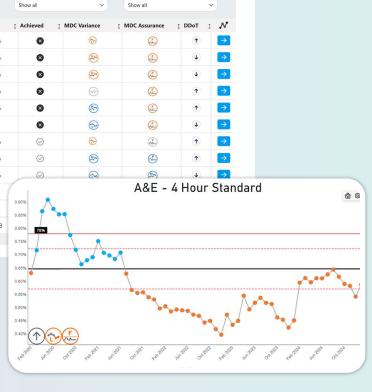

## Focus on what matters to you

The in-built interactive feature sorts and filters your chosen metrics, and quickly identifies areas for priority attention. Drill down into specific SPC charts for more detailed analysis of any issues.

## Drill down

A more detailed look at individual indicators to track performance trends, investigate variations and make more informed decisions to improve care delivery and patient safety.

#### Why EasySPC?

EasySPC Spotlight is the latest innovation within BCN's EasySPC software.

Providing a single overview of performance across multiple indicators, it shines a 'spotlight' on any unexpected results, enabling you to quickly identify potential issues and take the appropriate action.

> "With EasySPC charts in our IPR, it's really made us stand out and we're seen as a good example of how an IPR should be produced."

John Taylor, Hull University Teaching Hospitals

#### More ways we support NHS Trusts

We offer other solutions to enhance performance reporting and operational efficiency.

**Benchmarking services:** Compare performance with national averages and other Trusts using Public View.

**Dynamic reports:** Customised, interactive reports to visualise and analyse data with Power BI.

**Consulting services:** Expert advice and support to optimise performance and achieve strategic goals.

Automate processes: Our Microsoft Power App capabilities, delivering fast cost-effective, low-code, healthcare solutions.
