

# Microsoft Advanced Analytics Funding

This Microsoft-backed funding is designed to help organisations modernise their data estate and accelerate their analytics journey.

It supports the deployment of Microsoft Fabric and related services through pilot projects, proofs of value (PoVs), and full-scale analytics rollouts.

## What does the funding cover?

The funding supports two key stages:

### Proof of Value (PoV)

A pilot, PoV, or MVP using Microsoft Fabric. This includes deploying a Fabric-based data platform, connecting a data source, and building a Power BI dashboard.

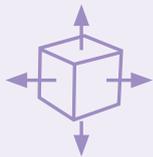

### Deployment

Scaling analytics workloads across your business using Microsoft Fabric, Azure Databricks, Purview, or ADX.

## Who is eligible?

Microsoft Advanced Analytics Funding is available to eligible UK businesses that are either new to Microsoft Fabric or expanding their use of Azure analytics services. A brief eligibility check with our team is required before funding can be applied.

## The benefits of investing in Fabric

Build a modern, scalable data platform

Unlock real-time insights with Power BI

Reduce manual reporting and data prep

Enable faster, smarter decision-making

Futureproof your analytics capability

## How much funding is available?

**Proof of Value funding: \$10,000**  
for a Fabric-based Proof of Value

**Analytics Deployment funding: \$5,000–\$50,000**  
for deployment projects, based on projected Year 1 Azure consumption:

Project size [Year 1 ACR]	Funding amount
\$10K–\$25K	\$5,000
>\$25K–\$125K	\$15,000
>\$125K–\$250K	\$35,000
>\$250K–\$500K	\$50,000

## Why BCN?

As a leading Microsoft Solutions Partner with deep expertise in data and analytics, BCN is uniquely positioned to deliver fast, effective, and scalable Fabric solutions. We've helped businesses across all sectors unlock the full value of their data and we're ready to do the same for you.
