

EasySPC Beta

Installation Guide

EasySPC Beta Installation Guide

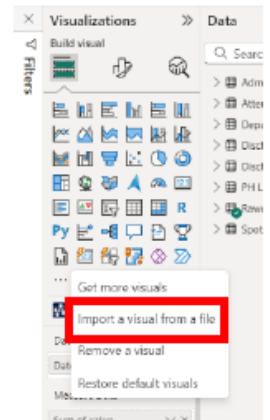

Step 1

In the **Visualizations** settings click the 3 dots to 'Import a visual from a file'.

Note: The development visual has not been certified by Microsoft so only import if you trust the source.

Step 2

Import the development visual from its saved location

Step 3

Update the visual in the report to use the development visual

Note: The development visual will have a light blue icon. You can confirm the version number by right clicking on the icon above and selected About to view the version.
