

This Microsoft Copilot Adoption programme helps organisations turn Copilot Chat into a strategic advantage. It focuses on embedding AI-driven habits that deliver **measurable, safe outcomes**.

We combine a thin layer of live enablement with a **12-month automated adoption engine** (Prompt Cards, Micro-demos, and monthly Challenges) and demonstrate impact through admin insights and usage analytics.

## Benefits Across the Organisation

### For Employees

**Save hours weekly with quicker content creation and smarter responses.**

*Portable templates and prompts ensure consistency across teams.*

### For Managers & Change Leads

**Drive throughput and predictability with better planning and reporting.**

*Replicable playbooks and templates support onboarding and change management.*

### For IT, Security & The Organisation

**Maintain control with clear adoption signals, risk management, and compliance safeguards.**

*Operational dashboards provide visibility into usage and security posture.*

## What you Get:

- ✓ **12-Month Enablement Programme:** Structured adoption journey with live sessions and automation.
- ✓ **Enterprise-Grade AI Experience:** Secure, web-grounded Copilot Chat for Microsoft 365.
- ✓ **Actionable Insights:** Usage data and metrics to track ROI.
- ✓ **Change Management Support:** Onboarding guides.
- ✓ **Governance & Security Assurance:** Aligned with Microsoft compliance.

## Why Start Here?

- **Proven Adoption Framework:** A structured approach that embeds AI habits across teams.
- **Measurable Impact:** Clear analytics and insights to track productivity gains and cultural adoption.
- **Scalable Approach:** Designed to grow across departments and adapt to your organisation's needs.

## Expected Outcomes

- **Productivity Gains:** Reduce time spent on admin and repetitive tasks.
- **Decision Cycles:** Summarise and act on information in minutes, not hours.
- **Cultural Adoption:** Move from curiosity to repeatable, governed AI habits across the organisation.

## Why BCN?

BCN is a Leading **Microsoft Solutions Partner** with deep expertise in Microsoft 365, Copilot, and AI-driven transformation. We help you embed AI habits that deliver measurable outcomes, reduce risk, and accelerate adoption. Backed by proven delivery and real-world experience.
